

Specification

IR FlexCam Thermal Imager with IR-Fusion Technology

- Portable thermal imager with a VOx uncooled micro bolometer sensor and a 320 x 240 FPA to capture high-resolution infrared images of thermal patterns
- Detects temperatures from -20 to +600 degrees C (-4 to +1112 degrees F) in three ranges, with an accuracy of + or - 2 degrees C or 2%, and a thermal sensitivity of less than or equal to 0.05 degrees C (50mK) at 30 degrees C
- Germanium lens to articulate 180 degrees for capturing images in areas with poor accessibility
- Certified to IP54 level of protection against dust and splashing liquid
